

9:00 – 12:00
2 APRIL,
2019

Theatrum Anatomicum,
9 Kronvalda bulvaris

Morphology: anatomy, histology, embryology, anthropology

PROGRAM

Moderator: Mara Pilmane

9.00 – 9.30	Andrejs Braun (United Kingdom).	Keeping genome in order: the role of the nuclear lamina in somatic mutations and progression of B cell malignancies.
--------------------	------------------------------------	--

9.30 – 10.00	Janina Tutkuvienė (Lithuania).	Variation in facial morphology and biopsychosocial factors of facial attractiveness.
---------------------	-----------------------------------	--

10.00 – 10.30 Coffee break

10.30 – 11.00	Andrejs Ivanovs (United Kingdom).	Embryonic Development of Haematopoietic Stem Cells in Human and Other Vertebrates: Lessons Learned from Animal Models and Xenotransplantations.
----------------------	--------------------------------------	---

11.00 – 11.20	Zane Vitenberga, Aurika Babjoniseva, Māra Pilmane (Latvia).	An insight into morphopathological findings of COPD: chronic inflammation, remodeling and antimicrobial defence.
----------------------	--	--

11.20 – 11.40	Anna Junga, Olafs Volrats, Zane Abola, Māra Pilmane (Latvia).	The significance of growth factors, degenerating enzymes, inflammatory and antimicrobial factors in the morpho-pathogenesis of intraabdominal adhesions in infants.
----------------------	---	---

11.40 – 12.00	Tatjana Zaķe, Sandra Skuja, Ieva Kalere, Ilze Konrāde, Valērija Groma (Latvia).	Role of immune system cells and impairment of the thyroid follicle integrity in the initiation of thyroid autoimmunity and tissue damage assessed by morphological methods.
----------------------	--	---

12.00 – 13.00 Break and transfer to RSU Dzirciema street 16
